

Spectur confirms no supply chain interruption from COVID-19

ASX Announcement | 27/02/2020

Solar camera, AI and IOT platform and solution provider Spectur Limited (ASX: SP3) ("Spectur" or "the Company") is pleased to confirm that the Company has experienced no interruption to the supply of Spectur platforms and solutions related to coronavirus impacts on the supply chain with China.

Highlights

- **Supply of componentry for Spectur systems is continuing to flow unaffected**
- **No restrictions on manufacture and supply of hardware**
- **Spectur systems are designed, manufactured and coded in Australia**

Supply of componentry

None of the core componentry within Spectur systems is of Chinese origin.

Key bespoke elements of the Spectur systems are manufactured in Australia:

- Printed circuit boards (PCBs) (Victoria)
- Internal and external fittings, fixtures and hardware (3D printed by Spectur or manufactured by local partners in Western Australia)
- Routers, batteries and solar panels (in stock and interchangeable with multiple suppliers)
- Processors (Korean origin, extended supply and alternatives available)
- Cameras (key long lead items held in extended inventory)

As Spectur designs systems from componentry and also writes all software and firmware internally (in Australia), there is flexibility to move between alternative providers should this be required in future.

There is no expectation of direct impact on Spectur due to interruptions in supply chains from China.

No restrictions on manufacture and supply of hardware for Spectur systems

Existing inventory levels of componentry and fully assembled systems are sufficient to meet forecasts for the balance of the financial year.

Executive commentary

Spectur Managing Director, Gerard Dyson, said:

"Spectur systems are designed, manufactured and coded in Australia. Our internal designs and engineering teams mean that our systems are inherently modular with interchangeable componentry."

"As well as securing our supply chain and ensuring ongoing ability to meet customer needs, Spectur is able to modify, improve and expand our systems and platforms for customers without reliance on singular manufacturers."

Ends.

This ASX release is authorised by the Board of Directors of Spectur Limited.

About Spectur Limited

Spectur Limited (ASX: SP3) is an Australian-based company which owns the rights to its innovative hardware and disruptive solar powered camera, IoT and AI solutions and platforms which operate in Australia and New Zealand. The two largest industries that Spectur currently services are the government / utilities sector and the building/construction/civil industry. Spectur's core products are solar powered deterrence and surveillance systems and associated cloud based platform. These systems incorporate cameras, AI, lighting, audible warnings and a hardware IoT platform. The systems are remotely accessed and connected via 3G/4G technology to a cloud based platform. Spectur has also added long distance, 24-hour thermal camera surveillance and off-grid warning systems to complement its existing product base. The Company is implementing a strategic growth plan to build market dominance in the Australian government and utilities sector whilst continuing to grow and service the building/construction/civil industry.
