Spectur 3G/4G HD5 Solar Security Camera System

The Spectur HD5 Solar Security Camera is ideal for remotely monitoring your site - 24/7. It is a completely self-contained system that records to the cloud via a built-in 3G/4G modem with no cabling, power ports, or special installation required. Recorded video is available for viewing at any time, proving to be the perfect solution for property owners, farmers, and site managers looking for a high-level surveillance device.

Spectur offer a range of camera lenses to suit different site locations and conditions. For further advice and assistance please contact your local Spectur Solutions Representative
